Braided Wire Jewelry (A Schiffer Book for Craftspeople)

Loretta Henry : Braided Wire Jewelry (A Schiffer Book for Craftspeople) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Braided Wire Jewelry (A Schiffer Book for Craftspeople):

53 of 55 people found the following review helpful. really elementary. good for school children, perhaps
By A Customer
this book only uses one form of braiding, and spends pages explaining how to do it -- the same braids we all learned as children, for pigtails. Then the patterns are gussied up with beads but there's nothing here the rankst beginner wouldn't invent for onesself -- nothing new. A pity.

Disappointed
By L. Denton
I was very disappointed with this book. As a metal weaver and instructor of wire wrapping, this looked like a wonderful book to share with my students and new techniques for me to try. There were many pictures and drawings that I felt were difficult to follow as the actual things we needed to see were too small. The potential was there, but the technique failed. It appeared to be a revival of 70's art mixed in with primitive Native American style.

a whole new wire world

A new type of craft, braided wire jewelry does not require expensive equipment and can be made by almost anyone with easily found materials. Come and give it a try! Pretty, delicate-looking (but actually quite strong) jewelry, including pendants, pins, watchbands, and earrings, can be made from wires, beads and stones. Cute monkey, butterfly, and cross shapes are shown, and you are encouraged to design your own styles once you learn her techniques. Let your imagination go! Have fun being creative! Step-by-step instructions with color photographs and detail drawings guide you through the basic techniques and seven projects with various levels of difficulty.

About the Author Loretta Henry is a talented craft designer from Utica, Kentucky.
