MichaudI purchased a Buck Master knife at a local gun show not knowing what I was really purchasing. The price I paid for this knife is small compared to what it costs to purchase one today. Now there is a book by Richard Neyman that tells the

entire story about this type of knife and others similar to it. The book is loaded with great pictures and drawings. It is an interesting read. After reading this book I feel rather fortunate that I purchased a knife that has historical significance. The book is also autographed.0 of 0 people found the following review helpful. Great book to fit the knife!By Jesus MartinezGreat book to fit the knife!Reference book to find both models as different finishes and year of manufacture.Good service.0 of 0 people found the following review helpful. The BuckMaster survival knife was conceptualized, designed and built specifically for Navy SEAL Teams Six and Three in the 1980s. This book explores the complete history of the knife and includes interviews with the designers, technicians, the Navy SEAL Team Three commander at that time, and CJ Buck, CEO owner of the company that manufactured the knife. The 352-page book also includes information about the M9 bayonet and contains more than 100 photographs, about a fourth of which are in color.

About the AuthorRichard Neyman is an expert on survival knives. He lives in Post Falls, Idaho.
