Indian and Oriental Arms and Armour (Dover Military History, Weapons, Armor)

Lord Egerton of Tatton : Indian and Oriental Arms and Armour (Dover Military History, Weapons, Armor)
before purchasing it in order to gage whether or not it would be worth my time, and all praised Indian and Oriental Arms and Armour (Dover Military History, Weapons, Armor):

0 of 0 people found the following review helpful. One of the ClassicsBy MRGThis book is considered by many to be a classic in its field. It is easy to see why. The author does an impressive job of discussing a wide variety of weapons from India and neighboring countries. He examines not only the weapons and their uses, but also the cultures and societies that gave rise to them. The illustrations are outstanding. This book is a must-have for anyone interested in classical weapons from India and its neighbors.0 of 0 people found the following review helpful. Five StarsBy BKNExccellent though naturally 'dated' but with real information if you dig into the text.0 of 0 people found the

following review helpful. Five StarsBy Barry R. ParksA good refrence on indian weapons, well done with good information and pictures

Originally created in the late 19th century to catalog Indian and Oriental arms and armor for a British museum, this volume has long since become a sourcebook of vital information on the military history of India. Enhanced with excellent illustrations, it remains one of the few books available on the subject, providing factual accounts of events ranging from the earliest invasions of the subcontinent in 200 B.C. to the decline of the Mogul Empire (early 18th century) and the First Burmese War in 1824. In addition to information on military history, succeeding chapters describe Indian swords, helmets, knives, shields, daggers, spears, javelins, blowpipes, sabers, and a host of other weapons, including arms used for athletic and sacrificial purposes. Descriptive notes, grouped according to geographical areas, comment on styles of decoration, manufacturing processes, and ethnological characteristics. A shorter section of the book includes detailed information on Arab and Persian arms (maces, battle axes, matchlock guns, bows and arrows, etc.) and Japanese armor. Students of Far Eastern arms and armor as well as enthusiasts of military history will welcome this comprehensive reference. 350 halftones and line illustrations. 350 halftones and line illustrations.
