Sparce on technical detail and of limited use to the collector.By steve challisA interesting book but too short and not enough detail for the collector. The history of he company s covered but not all of the models produced. It reads more like a answer to a google query " who were iver johnson" rather than a guide for the collector.0 of 0 people found the following review helpful. More a magazine articleBy MichaelI read the entire book in under 30 minutes, it was pricey for a magazine article. Wanted serial number

information, more detail.0 of 0 people found the following review helpful. While the pictures are good, the information of the various models is basic ...By John Cadrettelf you have more than a passing curiosity of Iver Johnson revolvers, this is not the book for you! While the pictures are good, the information of the various models is basic at best.
