I have been collecting GI JOES for a while and will use their GI JOE listing to rate this book. After skimming through the GI JOE listings, which are all priced MIP or MOC, I believe that they do not reflect the current market. For example, a MIP USS FLAGG is listed at \$475-\$500. Every GIJOE collector would jump at the opportunity to buy them if this were the current market's price. This book is the 2010 edition, which at the time was still incorrect. If GI JOE's prices are incorrect, does that mean the rest of the book is incorrect as well?1 of 1 people found the following review helpful. Out of date GuideBy TommyGo find a more recent guide. This book is highly informative and up to date with its descriptions and prices. I use this book as my bible for toys because it contains not only the easy to get prices, but also the hard to find toy prices. The only draw back that I can see is I would like to see more pictures. This is a must for your toy collectible library of price books.- Thomas J. Niedermeier
