Stretch: America's First Family of Clockmakers

Donald L. Fennimore, Frank L., Jr. Hohmann : **Stretch: America's First Family of Clockmakers** before purchasing it in order to gage whether or not it would be worth my time, and all praised Stretch: America's First Family of Clockmakers:

1 of 1 people found the following review helpful. Just Beautifully Done in Every Aspect; Like a Museum Exhibit Inside a BookBy FiveOhThis beautiful book should be the standard for all future fine art authors. Everything about it is top-notch: the writing, the photography, the research, the organization, the selection of clocks, etc. I gave this book as a gift to a relative who owns an actual Stretch clock and she was beyond (and still is) ecstatic about the book. If you have an interest in American 18th century decorative arts or American-made clocks, you owe it to yourself to see this book.0 of 0 people found the following review helpful. Good publication for a specific topicBy JimWell researched and presented. Outstanding photos. Good historical data. A good presentation on a narrow topic.Not a must for every horological library but certainly educational and worthwhile for serious people.0 of 0 people found the following review helpful. High quality at a great price!By Bruce FormanThis book is well written and researched. It has been published in full-color and weighs over 5 lbs.. If you have an interest in American clockmaking before 1750 or in

Stretch clocks, you will enjoy reading this book.

This volume presents the definitive history of the UK-born Stretch family of clock-makers who emigrated to Philadelphia in 1703 and played an influential role in the city's early clock-making, civic, and Quaker communities.

Initial essays discuss the family and the importance of their Quaker beliefs; time-telling and the clock making community in pre-1750 Philadelphia; innovative mechanical advances made by the Stretches; and their notable civic and cultural contributions to the city. The catalog section of the book features 84 of the 133 Peter, Thomas, and William Stretch clocks discovered during the course of the project, illustrating and fully describing both the cases and the works. The majority of the clocks, passed down through the generations and still in private collections, are being published for the first time.

About the Author Donald L. Fennimore, Curator Emeritus, served as metalwork specialist at Winterthur Museum, Delaware, for 34 years. The list of his numerous publications includes *Metalwork in Early America* (Winterthur, 1996); *Iron at Winterthur* (Winterthur, 2004); and *Silversmiths to the Nation: Thomas Fletcher and Sidney Gardiner* (ACC, 2007). Frank L. Hohmann III, a retired Wall Street executive, is a collector of 18th-century furniture, with a concentration on brass dial clocks. He co-authored and published the volume *Timeless: Masterpiece American Brass Dial Clocks* (2009). He is a Trustee of Winterthur Museum, Delaware and a Liveryman in the Worshipful Company of Clockmakers.
