VaughanAn in-depth examination of the subject, thoroughly researched and presented in a clear, concise and understandable manner. Because it was written in the Thirties, the book lacks some of the more modern weapons, but a surprisingly large amount of the

information is as relevant today as it was then. An indispensable source of information for shooters, collectors and writers who want to ensure the accuracy of their work. 0 of 0 people found the following review helpful. Reference on handguns history By Erick Written eight decades ago, Textbook of Pistols and Revolvers is an excellent source about old - and classic - handguns. Useful both to beginners and experts, shooters and collectors. 0 of 0 people found the following review helpful. good firearms history from the 1930's By Paul Kalman excellent look at the past, well written . recommend

Originally published in 1935, Textbook of Pistols and Revolvers is a treatise on handguns of the early twentieth century. Written by Major Julian S. Hatcher, an expert on the subject of firearms of all sorts, readers will gain invaluable insight into everything to do with handheld firearms of the 1930s. In his introduction, Hatcher emphasizes that he has made an earnest effort to make this book accessible for both novices and experts. Novices who know nothing whatsoever about firearms and their use can easily learn from this book, while experts will find a technical reference book where the results of many experiments with pistols and revolvers and their ammunition are tabulated in convenient form. Covering such subjects as the different methods of shooting and using hand firearms; their mechanism, care and repair; their interior and exterior ballistics; the peculiar suitability of the different kinds for various purposes; the relative effectiveness or stopping power of the various calibers and types of gun and ammunition; and many more, this book is an immense store of knowledge on early handguns. Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

About the Author Major Julian S. Hatcher was born in Winchester, Virginia, in 1888. He went to the United States Naval Academy in Annapolis and received his BS in 1909 as an honors graduate. After transferring to the US Army in 1910, he was promoted to lieutenant colonel during World War I. He was stationed in Washington and served several months in 1917 to 1918 as chief of machine gun and small arms engineering and design. He contributed writings early on to the National Rifle Association's house publication Arms and the Man, the predecessor title to The American Rifleman. He is also the author of Textbook of Firearms Investigation, Identification, and Evidence, Machine Guns, Handloaders Manual: A Treatise, and many more. He died in December of 1963.
