Eduard Kann : The Currencies of China: An investigation of silver gold transactions affecting China with a section on copper before purchasing it in order to gage whether or not it would be worth my time, and all praised The Currencies of China: An investigation of silver gold transactions affecting China with a section on copper:

Eduard Kann (1880-1962) was a leading authority on Chinese coins. His first great work was "The Currencies of China", published in 1927 in Shanghai, China and reprinted in 1975 in New York. This massive work of 562 pages provides a history of the Chinese monetary system, and is of immeasurable value to collectors and numismatic researchers. The work reprinted here is of immense value, as it provides illustrations and photographs of the actual coins, most of which were in Dr. Kann's personal collection. He refers to this catalog as "A Labor of Love".
